

WATER & TAILING DAM SUPERINTENDENT

POSITION

Water & Tailing Dam Superintendent

ABOUT US

Lundin Gold Inc., headquartered in Vancouver, Canada, is part of the Lundin Group of Companies, one of the most recognized, respected and powerful resource groups in today's global industry. The group comprises 13 publicly traded companies focused on the resource sector in more than 17 countries around the world.

Lundin Gold, through its Ecuadorian subsidiary Aurelian Ecuador S.A., owns the Fruta del Norte (FDN) project, located in southeast Ecuador, in the province of Zamora Chinchipe. FDN is one of the largest and highest grade undeveloped gold deposits in the world. The Company has an experienced board and management team with extensive expertise in construction and operations dedicated to the advancement of this exceptional project.

With its key mining contracts with the Government of Ecuador in place, Lundin Gold has now embarked on construction of FDN. The Company is on track to deliver first gold in the last quarter of 2019 and achieve commercial production in the second quarter of 2020. At the same time, the Company is carrying out exploration activities on its other concessions in close proximity to FDN in search of new deposits.

Lundin Gold operates with transparency and in accordance with international best practices in the areas of sustainability, health and safety, environment and community relations. The Company is committed to addressing the challenge of sustainability - delivering value to its shareholders while simultaneously providing economic and social benefits to nearby communities and minimizing its environmental footprint.

THE ROLE

Responsible for the operation and management of the Tailings Transport Systems, as well as the operation and management of the surface water management of the FDN unit and in compliance with the production plan and HSEC requirements, to ensure the efficiency of the design, operational standards and execution of maintenance, tailings distribution processes, return water to the Plant and the balance of surface water and its distribution.

RESPONSIBILITIES

- Operation and maintenance coordination of the Tailings and Water Fluid Transport systems.
- Administration of contracts for operational support and external services.
- Prepare periodic reports on the management of the area.
- Ensure compliance with legal and environmental regulations in operation of the dam and surface water system and its components.
- Generate and review Work Regulations and Procedures, together with the staff in charge.
- Generate reprogramming in case of availability contingencies.
- Collaborate in the planning of short and long term equipment maintenance, participating in the meetings of the Maintenance Department, channeling maintenance requirements arising from the supervision of their areas.
- Coordinate with the Maintenance Area the performance of preventive and symptomatic maintenance of equipment, defining priorities and agreeing deadlines.

SKILLS AND EXPERIENCE

- Bachelor's degree in Geo-mechanical, Civil, Mine engineering or other related discipline.
- Minimum 10 years in mining operations related to tailings dams and water management (desirable experience in water balances).
- Advanced Knowledge of Risk Prevention.
- Knowledge in pulp discharge pumps, tailings dam operation and recirculated water.
