### ABOUT US

---

Lundin Gold Inc. headquartered in Vancouver, Canada, is part of the Lundin Group of Companies, one of the most recognized, respected and prominent groups in the global industry today. It is comprised of 13 publicly traded companies focused on the extractive sector, operating in more than 17 countries around the world.

Lundin Gold, through its Ecuadorian subsidiary Aurelian Ecuador S.A., owns the Fruta del Norte Mine (FDN), located in southeastern Ecuador in the Zamora Chinchipe Province.

Fruta del Norte (FDN) is one of the largest and highest grade gold deposits in the world currently in production. The Company has an experienced mine operations team dedicated to advancing FDN responsibly. In the fourth quarter of 2019, Lundin Gold realized first gold production as well as the first export of gold concentrate and doré bars. In the first quarter of 2020 FDN achieved commercial production. Lundin Gold operates transparently in accordance with international best practices and according to its three core principles: Working Safely, Environmental Stewardship and Respect.

### THE ROLE

---

Underground Mine Manager is responsible to manage all underground operations. Leads the mine operations management team responsible for safe production, development and infrastructure construction in a manner that fosters individual accountability within clearly established parameters to ensure maximum productivity while adhering to provincial safety and environmental legislation, regulations, Company policy and procedure, and good management practices.

### RESPONSIBILITIES

---

- Lead the strategic planning of the mine operations group while collaborating with maintenance and technical services leaders to optimize the operation.
- Develop and lead the continuous improvement initiatives in the mine operations group to enhance productivity throughout the mining cycles.
- Direct mine operations to ensure that mine production plans (tonnes and grade) are achieved to feed the mill, safely and efficiently.
- Direct mine development, by owner's and/or contractor's crews, to ensure safe and efficient advance.
- Manage contracts associated with the mine to control costs and maintain critical path schedules.
- Develop and meet the mine operating budget to control mining costs and to maximize the ore body.
- Review and approve mine plans (short and long term).
- Contribute to the general management of the operation as a member of the senior management team.
- Participate in underground emergencies as the Emergency Control Officer responsible for all rescue and recovery operations.
- Promote and hold accountable all mine personnel to follow safety standards and achieve zero harm.

### SKILLS AND EXPERIENCE

---

- Bachelor's degree in Mine or Technical professional diploma.
- Minimum 20 years of mining experience, with increasing levels of responsibility, including years at the superintendent level or above and exposure to all areas of underground operations.
- Thorough knowledge of relevant legislation and general management principles.
- Background in open stoping with paste backfill operation; remote site experience preferred.
- Has a broad knowledge of mining methods and procedures.
- Cost management and budgeting.
- Bilingual communication skills (English - Spanish).
