

Senior Mine Operations Engineer

POSITION

Senior Mine Operations Engineer

ABOUT US

Lundin Gold Inc., headquartered in Vancouver, Canada, is part of the Lundin Group of Companies, one of the most recognized, respected and powerful resource groups in today's global industry. The group comprises 13 publicly traded companies focused on the resource sector in more than 17 countries around the world.

Lundin Gold, through its Ecuadorian subsidiary Aurelian Ecuador S.A., owns the Fruta del Norte (FDN) project, located in southeast Ecuador, in the province of Zamora Chinchipe. FDN is one of the largest and highest grade undeveloped gold deposits in the world. The Company has an experienced board and management team with extensive expertise in construction and operations dedicated to the advancement of this exceptional project.

With its key mining contracts with the Government of Ecuador in place, Lundin Gold has now embarked on construction of FDN. The Company is on track to deliver first gold in the last quarter of 2019 and achieve commercial production in the second quarter of 2020. At the same time, the Company is carrying out exploration activities on its other concessions in close proximity to FDN in search of new deposits.

Lundin Gold operates with transparency and in accordance with international best practices in the areas of sustainability, health and safety, environment and community relations. The Company is committed to addressing the challenge of sustainability - delivering value to its shareholders while simultaneously providing economic and social benefits to nearby communities and minimizing its environmental footprint.

THE ROLE

Provide support to the underground mine senior staff in planning and controlling the operations activities of the underground mine.

RESPONSIBILITIES

- Review, recommend and prepare plans-designs for the operation of the mine.
- Review the drill and blast designs in the production chambers while working in conjunction with the engineering area for the optimization, planning and control of production blasting.
- Provide support to the shift managers and operation supervisors with the planning and assignment of tasks.
- Assist in the drill and blast control works within the production chambers in a safe and effective way.
- Identify and recommend action plans when faced with deviations in budgets and mine plans to help achieve the assigned goals.
- Contribute to the development and implementation of operational procedures in the underground mine.
- Plan and provide effective recommendations on the management of the underground mine resources in order to comply in a safe, efficient and effective manner with the productive and quality goals of the underground mine.
- Support the implementation and maintenance of underground mine policies & procedures.
